

What's in a Name?

Nothing or everything. By the name of a machine is its reputation known. It may be good or bad, just as the manufacturer makes it. It is just so with the DEERING. Just as soon as the name DEERING is mentioned, the farmer immediately thinks of its synonym, "Best." For a long time the DEERING has been growing in favor and season after season the manufacturers have been making it so that it will have a better claim on the title BEST, until now, it is absolutely without a rival. DEERING agricultural implements are in a class alone. Headers, Rakes, Mowers, Binders are all the same—the lightest draught, easiest running and nicest cutting machinery on the market today. A trial is all we ask, or ask your neighbor who uses a DEERING. He will know. We are always anxious to explain these machines to you, and will gladly do so if you will call at the store, or if you find it inconvenient to call, just drop us a line on a postal and we will send you a very interesting and nicely arranged catalog.

CANANEA TO BE CAPITAL.

New Mining Center for Mexican State
All Denunciations to Be Made There.

According to a special to the Bisbee Review, from September 1, 1906, Cananea is to be the chief government center of the District of Arizona. Arizona has heretofore been the capital and the place at which all mining claims were finally registered and from which the final papers were given out.

From September 1, Cananea will be the center of the mining industry, and

Arizona will cease to have any control of this most important source of the wealth of Sonora. The government offices will be moved to Cananea in August, and it is expected that by that time commodious quarters will have been built which will greatly increase the ease with which the numerous mining denunciations may be made.

It is expected that the making of Cananea the head of the mining industry will cause the city to become much more populous and prosperous, since it will be necessary for all mining men to go there to transact business.

It is stated on the most reliable authority that Dr. F. V. Borroso, who has been mayor of Cananea for the past year, has been ordered to resign, and that his successor will arrive in the city in a few days. The cause for this action on the part of Governor Yzabel is not known, but it is said that Borroso's dislike for Americans is one of the strongest reasons.

DEATH BY DROWNING.

Two Children Lose Their Lives in Irrigating Ditch.

Two Mexican children lost their lives by drowning in irrigating canals—one a 3-year-old girl in Solomoni and the other a 7-year-old boy in Safford, says the Solomoni Bulletin.

About 11 o'clock Monday morning a week ago Solomoni was thrown into a high state of excitement when it was learned that the little 3-year-old child of Abundio Bonillas, a Mexican living on the bank of the Montezuma canal, was missing. The child's footprints were found on the bank of the canal, and a few wild flowers that she had gathered were lying near the water's edge. This was conclusive evidence that the little girl had fallen into the canal and lost her life.

The stream was dragged for several hundred yards and men were sent to follow the canal in search of the body. About noon the body was found floating on the surface of the water about two miles below town.

During the same day word reached Solomoni from Safford that 7-year-old boy of Trinidad Cardenas was drowned in the mill ditch near that town. It is understood the boy was playing on the bank of the stream when he lost his footing.

Said a sporting lad to a winsome maid: "Come on I'll go you a game of bandy, And if you win I'll give you a box Of Donofrio's Cactus Candy."

Dr. L. M. Swikerath, the optician leaves for Denver, May 1. If there is anything the matter with your eyes or in need of glasses see him at once, 21 E. Washington St. (Upstairs.)

"How do college degrees benefit a man?" "They vary the monotony," answered the coffer, "by enabling him to wear initials after his name instead of before."—Philadelphia Ledger.

THE DEADLY LOGO CURSE OF STOCKMEN

Horses Dying at an Alarming Rate Says Dr. Norton.

Dr. J. C. Norton, veterinary surgeon of Arizona, and Dr. Bray, holding a similar position with the government, with headquarters at El Paso, were in Douglas on Tuesday en route to San Bernardino ranch. To a reporter of the International-American, Dr. Norton said:

"With the exception of horses dying at an alarming rate from eating loco weed, the stock condition in Arizona is first class.

"I am in receipt of many complaints of horses dying from the effects of loco weed, and especially does the trouble seem to be alarming in northern Arizona, where a number of good horses have been lost in the last few weeks. Some are dying in southern Arizona, but the death rate is not so alarming as in the northern counties.

"This loco weed has been the subject of long investigation by the southwestern states, as well as by the government, but the results of the researches have not been satisfactory. The weed is well known, but it has not been definitely decided that it is the cause of the death of stock generally attributed to it. There have been many cases where the weed was fed to stock without any visible effect.

"In Colorado a series of close experiments were carried on by the state live stock commission, but the reports left the matter yet in doubt, while an analysis of the weed does not show the presence of any poison. But the experiments have lately been renewed in Colorado, and an effort is now being made to have the government take up the matter of the loco weed in Arizona."

Dr. Norton reports the entire cattle range of the territory to be in excellent condition, and at many points arrangements are being made for the spring shipments of cattle, which promise to be unusually large this year.

BOOK NOTICE.

Baldwin's Nine Choice Poems. Edited with introductory sketches and notes by James Baldwin. Cloth 12mo., 112 pages, with portraits. Price 25 cents. American Book company, New York, Cincinnati and Chicago.

Nine of the best known short poems of Longfellow, Lowell, Macaulay, Byron, Browning and Shelley. The explanatory notes are brief and few, for the introductory sketches are intended to awaken such interest in the poems as a whole as will lead the pupils to discover for themselves whatever is most useful to understand. The biographical sketches are designed chiefly for reference. These particular poems were selected because they form the requirements of the New York State Educational Department for examinations for preliminary certificates in English. As here edited they will aid the young reader to grow into an appreciation of the best poetry.

ANTS LIVE ON LICE.

In their migration from plant to plant the lice are often aided by their foster-mothers, the ants, for many species are carefully cared for and guarded by the ever-diligent ants. A peculiar, sweetish liquid called "honey dew" is secreted by the aphides of which the ants are extremely fond. To secure this they herd the aphides, much as if they were little green cattle. Frequently an ant may be seen tapping an aphid with her antennae, upon which a drop of honey dew is exuded and quickly lapped up. Thus, the ants are probably entirely responsible for carrying the young aphides which affect the strawberry roots in Delaware, Maryland, New Jersey and elsewhere, from the foliage down to the roots, and for carrying them from plant to plant, as the plants wither from their injury. The melon louse is similarly carried by the ants from hill to hill. But most remarkable of all is the case of the corn-root aphid, which lays its eggs in ants' nests in the fall, where they are carefully guarded all winter, and in the spring the young aphides are carried by the ants to the roots of their favorite food plants.—E. D. Sanders in April Garden Magazine.

A widow never tells a man what good habits her first husband had until after she marries him.—New York Press.
